FIELD SERVICE BULLETIN

TO: All Navion Owners

SUBJECT: STARTER ENGAGING MECHANISM REWORK

To prevent the starter mechanism from remaining engaged after the engine has started, an additional starter return spring is necessary. The required parts furnished in 145-89033 Kit, are installed as follows:

Warranty Adjustment will be based on a Standard Time Allowance of 14 minutes (.233 hour). If you have sold your Navion, please return this kit to the factory with the name and address of the new owner.
